

Kaaveh Mohamedi

Senior Android Engineer

Tehran, Iran (Open to relocation) | +98 930 296 2489 | Kaaveh@pm.me | LinkedIn.com/in/Kaaveh

7+ years building consumer Android apps, plus architecture consulting for a bank and a crypto exchange. Owned an Android TV app end-to-end on a platform with 10M+ MAU. Cut CI build times 44% through modularization. Active in the community: 4 conference talks, 8 [Medium](#) articles, 500+ [GitHub](#) stars.

Skills

Languages & Concurrency: Kotlin, Kotlin Multiplatform (KMP), Java, Coroutines, Flow, multithreading

UI & Platforms: Jetpack Compose, Compose for TV, Material 3, Navigation 3, XML Views, Media3, ExoPlayer

Accessibility: TalkBack, Compose semantics, font scaling, touch targets, focus order

Architecture & DI: Clean Architecture, MVI, MVVM, Modularization, Server-Driven UI, SOLID, Dagger, Hilt, Koin

Performance & Stability: Baseline Profiles, Macrobenchmark, LeakCanary, Android Profiler, Crashlytics, Sentry

Data & Networking: Retrofit, OkHttp, Ktor, GraphQL, Room, SQLDelight, DataStore, WorkManager, Firebase

Testing & Quality: TDD, BDD, JUnit, Kotest, MockK, Mockito, Turbine, Espresso, Robolectric, Detekt, ktlint

CI/CD & Observability: Gradle, Kotlin DSL, GitLab CI, GitHub Actions, Firebase Analytics, A/B testing

AI & LLM: agentic workflows, MCP, Spec-Driven Development, Spec Kit, Claude Code (custom skills), Antigravity

Experience

Senior Android Engineer - Oddrun (Full-time)

02/2025 - Present

Football: football-focused sports streaming platform with live matches, real-time stats, and prediction games, serving 10M+ monthly active users across Android, Android TV, iOS, and web. Part of a 15-person cross-functional team (backend, frontend, Android, product, design), reporting to the Android Team Lead and the Product Owner.

- Architected and shipped the Android TV MVP solo in 2 months, shaping with the PO and designer its product and UX decisions; TV grew to 36% of platform watch time, contributing to a 19% revenue growth in H1 2026.
- Championed AI-assisted development company-wide through hosting workshops, adopted by 30 engineers.
- Introduced automated integration testing, shortening release cadence by ~50%.
- Instrumenting playback telemetry (startup time, rebuffering, errors) for a live-stream alerting platform, coordinating with backend and DevOps to replace manual oversight with instant alerts to the operations team.

Senior Android Engineer - Tabdeal (Contract)

09/2024 - 02/2025

Cryptocurrency exchange with 23M+ monthly active users.

- Designed the native Android architecture for the PWA-to-native migration, enabling 3 engineers to ship v1 in 4 months and raising the Play Store rating from 3.7 to 4.3.

Android Engineer - GityMarket (Full-time)

01/2019 - 09/2024

E-commerce platform powering 1,000+ retail businesses.

- Cut CI build time by 44% (from 90 to 50 min) by restructuring 55 Gradle modules and their dependencies.
- Extended the Server-Driven UI framework to ship 3 features with no Play Store release, shrinking lead time from 2 weeks to same-day.
- Established a design system (themes, tokens, shared widgets) adopted by 23 modules, reducing new-screen dev time by ~20%.

Community & Speaking

- Produce software engineering and AI-driven development videos on the [CodeWithKaaveh](#) YouTube channel.
- Authored a master course on SQLDelight via Droidcon, the global Android developer conference organization.
- Mentored 20+ software engineers.**

Projects

ComposeNews: Reference Compose architecture project. Used as a teaching reference in a conference talk.

SDP-Compose: Published Kotlin library providing scalable size units for Jetpack Compose.

Education

M.S. in Computer Software Engineering - Tarbiat Modares University

2017 - 2019

B.S. in Computer Software Engineering - Guilan University

2013 - 2017
